A Personal Perspective The GLOBE Program is one of the most beneficial curricula developed to effect reform in science education. The collaborative partnership between the University of West Georgia and the Georgia Institute of Technology as a statewide initiative has impacted innumerable students in school districts across the state. The implementation of the program has placed the concepts of authentic learning, student-scientist partnership, and inquiry-based pedagogy into a pragmatic context. If we are to succeed in effecting reform in science education and fulfill the goals of Project 2061, science literacy for all Americans, If we are to succeed in we must develop curricula that provide the venue for students to effecting reform in become self-directed researchers and actively engaged in the learn-science education and fulfill the goals of Project ing process. We must also provide the professional development for 2061, science literacy for in-service and pre-service teachers for implementing standards-all Americans, we must based teaching and learning. develop curricula that provide the venue for students to become self-Subsequent chapters are written by in-service teachers who were directed researchers and participants in the GLOBE training program. Chapters two through actively engaged in the six are first-hand accounts of a specific protocol implemented in learning process. their respective educational settings. Each chapter was also co-authored by a science educator or scientist in their respective field or discipline. In some cases, the accounts include how the GLOBE training acted as scaffolding for extending or developing related projects or course offerings. The concluding chapter summarizes the impact of the GLOBE...
